

ASBESTOS MONITORING AND NOTIFICATION

The Anamosa Community School District is required by law to provide annual notification regarding asbestos and the monitoring of our asbestos plan.

The Asbestos Hazard Emergency Response Act of 1986 (referred to as AHERA) was enacted to determine the extent of and to develop solutions for any problems schools may have with asbestos.

The District Asbestos Management Plan was created in response to this Act and is regularly updated by Thomas E. Haas, a licensed Asbestos Inspector/Management Planner. It is the District's responsibility to comply with federal, state, and local regulations governing asbestos in order to ensure that our children and our employees have a healthy, safe environment in which to learn and work. This annual notification, and continued education and training of our employees are all part of our continuing efforts to meet governmental regulations (AHERA).

A copy of the district's Asbestos Management Plan is available for inspection at our facilities' Administrative Offices during regular school hours. All inquiries regarding the Asbestos Management Plan should be directed to Superintendent Lisa Beames at 319-462-4321.
